Personal Statement

Am a life student who tends to learn new things everyday and working on being one of a very owned self-driven guy who is capable of solving problems and be honoured to learn from those who have prospered

Highlighted Software Projects.

[Live Site](#). [Source Code](#)

Stock Inventory App. Mobile Application for Stock Inventory. I collaborated in this group project by bringing out endpoints so that it can be consumed

- I worked on building the backend including Authentication flow so that the user can Create an account successfully and be able to get a token when one forgets their password
- I have deployed the project to Heroku Server to keep online all the time for usage.

[Live Site](#). [Source Code](#)

Library Service Management. Library management offers service to those who want to borrow a book in any circumstance in different kind of locations

- The Application Has an authentication system which a user needs to login and authorize himself. The app has 2 sections: the student side and admin side which makes it easy for a person to get the services they require.
- I have deployed the project to Heroku Server to keep online all the time for usage.

Technical Skills.

Strong : Django, Python, HTML, CSS, Postgres Database

Experienced: Python-Django and Postgres Database
